SAMSUNG

Engineer, SAMSUNG AI CENTER MOSCOW, Moscow, Russia.
- Currently involved in a neural avatar relighting project.
- Worked on three neural point-based rendering algorithms (accepted to ECCV'20 and 3DV'20). Captured a specific dataset of fixed-pose people required for this work.
- Worked on human body image resynthesis from unseen camera positions.
- Was investigating an ununsual approach to image inpainting based on image deformations.

06/18 — 01/19

SAMSUNG

Assistant Engineer, SAMSUNG AI CENTER MOSCOW, Moscow, Russia.
- Developed a technique for learning of image warpings for face/body rotation.
- Co-authored a paper on body resynthesis in new poses (accepted to CVPR'19).

01/2017 — — 05/2018

YOUTH LABORATORIES

Deep Learning Engineer, YOUTH LABORATORIES, Moscow, Russia.
Worked as an R&D engineer on several medical imaging projects.
- Main researcher and developer of wrinkles analysis project.
- Researcher and developer of the recommendational system for skin aging.
- Co-organized the Skinhack 2.0 hackathon (Nov 2017).
Research was funded and supervised by Nivea (Beiersdorf AG), Hamburg, Germany.

07/2016 —	**Deep Learning Intern**, ARTEC 3D, Moscow, Russia.
— 09/2016	Performed facial recognition on RGBD data from Artec 3D scanners. Developed algorithms for facial landmark detection on RGBD data intented for better handling of occluded and rotated faces.
